COMPUTER NETWORKS & TECHNOLOGY DISCIPLINE PROCEDURES

Computers are the property of Kittatinny Regional High School. The Administration reserves the right to investigate all files and e-mail boxes.

Level 1:

Inappropriate Use of Equipment

This may include, but is not limited to, offenses that are mischievous in nature, but do not physically damage the equipment. For example: using another student's password, printing out or displaying offensive messages, playing computer games, etc.

A student can make up classroom assignments (which require a computer) after school. For a serious offense, the classroom teacher may also impose other penalties such as teacher detention.

First offense:

Student is locked out of network for one week. He/she must report to Computer Lab to fill out a request to be reinstated. These requests will include space for student to indicate that he/she understands the offense he/she committed. All request forms will be kept on file.

Second offense:

Student is locked out of network for two weeks. He/she must report to Computer Lab to fill out a request to be reinstated. These requests will include space for student to indicate that he/she understands the offense he/she committed. All request forms will be kept on file.

Third offense:

Discipline referral with mandatory parent conference. Copies of past offenses will be supplied to appropriate Assistant Principal. A computer network lockout will be in effect until the parent conference has taken place.

If the offense is such that it could jeopardize teacher grades, tests, materials, or other students' work, student may be locked out of the KRHS Computer Network for the remainder of the year and placed on a stand-alone computer for course requirements.

Level 2:

Physical Damage to Software, Hardware, or Peripherals

This may include, but is not limited to the following: defacing equipment, taking equipment or disks, removing or changing cable connections, acquiring unauthorized system rights, i.e., giving someone supervisory status or rights; interfering with teacher/student material on network, etc. Students must be aware that disconnecting a cable in some computer labs or tampering with software may cause a part of the entire network to go down. This may take several hours to trouble shoot and correct.

All Offenses:

Discipline referral form with mandatory parent contact and payment for parts and labor. Students will be billed at vendor repair rate even if in-house personnel repair problem or replace equipment. Payment must be made before student is allowed to use any computer equipment. Student may be denied access to network for rest of the year. These monies will be returned to the account of the department where the damage occurred or to the school equipment repair account.

Floppy Disk/C.D. Policy

Students are not permitted to place their own floppy disks into any KRHS disk drive without first obtaining explicit permission from a teacher. That teacher must be informed of all files that will be transferred from the floppy to the network. Any student who places files on the system without permission will be subject to the disciplinary procedures. If a virus or any damaging files are placed on the system the student responsible will pay for the repairs at the rate set by the schools computer vendor.

Note: These procedures will be implemented in conjunction with applicable Uniform Discipline Code guidelines.

INTERNET ACCEPTABLE USE POLICY

One of the goals of Kittatinny Regional High School is to promote educational excellence by facilitating resource sharing, innovation and communication for both students and staff. The Internet is one resource in accomplishing that goal. At Kittatinny, the use of the Internet must be in support of educational endeavors. The Internet is a rich source of information that would be impossible to find by other means. However, with access through the Internet to computers and people all over the world also comes availability of material that may not be considered to be of educational value in the context of school settings. There may be some material or individual communications that are not suitable for school-aged children.

In acknowledgement of the availability of inappropriate material and the potential for misuse of the Internet, Kittatinny Regional School District has adopted standards for acceptable use of the Internet when accessed at Kittatinny. It is impossible to control all materials on a global network and an industrious user may discover inappropriate information. Kittatinny Regional School District views information gathered from the Internet in a same manner as information gathered from other sources. Inappropriate material gathered from the Internet or any other source would be treated according to Uniform Discipline Code in the Student Handbook

ACCEPTABLE Use of the Internet

Acceptable use of the Internet includes but is not limited to:

- finding and using material that will enhance learning experiences designed by the educational staff;
- finding and using information that will enhance independent study projects;
- downloading information from the Internet after obtaining written permission from a teacher or Computer Lab aide. (When you have acquired written permission, you may download the file to your personal directory and it will be scanned for viruses. You should move or delete these files in a timely fashion.);

- notifying a teacher if you receive any e-mail messages that are offensive, confusing, threatening or inappropriate ;
- using acceptable standards of grammar when sending appropriate messages; and/or
- maintaining security. (Security is a high priority. If you identify a security problem, you must notify the system administrator immediately. Do not show or identify the problem to others.)

UNACCEPTABLE Use of the Internet

Unacceptable use of the Internet includes but is not limited to:

- searching for, going to or using sites which include porno-graphy, unethical or illegal solicitation, racism, sexism, terror-ism, inappropriate language or other objectionable material;

- using another individual's account. (Attempts to log on as another user will result in cancellation of your privileges. Any user identified as a security risk or having a history of problems with other computer systems may be denied access.)

FAILURE TO FOLLOW THESE INTERNET GUIDELINES WILL RESULT IN LOSS OF YOUR SCHOOL-SPONSORED INTERNET AND INTRANET ACCESS AND SUBJECT YOU TO DISCIPLINE ACCORDING TO UNIFORM DISCIPLINE CODE.
