

## Geometry Honors - Summer Assignment

For our class next year you will need a binder filled with loose leaf paper and a scientific calculator. You will keep notes, worksheets, and homework assignments in this. I will periodically check and grade your binder, so make sure it is neat and up to date.

In order to review important algebra concepts and get a head start on the year, you will be completing the preparing for geometry chapter in the textbook. Read each section and take notes in chapter 0. Each section should be neatly labeled in your binder. Make sure you know the definitions of all highlighted words. Complete the odd exercises in each section.

On the **first day** of school make sure to bring your covered textbook, calculator, and your binder with all of the notes and exercises completed in it. We will go over them on the first day and you will have a quiz shortly after.

Have a great summer and see you in September!
