June 2018

## **Advanced Placement Environmental Science (APES) Summer Assignment**

*Assignment should be completed by first week of school in September*

*Please pick up the following materials in B-43 by June 22, 2018. After June 22, see Mr. McNicholas.*

### **Special Focus Reading Packet**

#### **• Impacts on the Environment and Human Health**

1. Please read the above packet carefully over the summer. You should keep a three-ring binder for documents like this one, which you will receive throughout the school year. You may make margin notes or high light terms and passages as you see fit. The questions at the end of the reading are typical of the questions you will see on the AP Exam in May. After reading them and understanding what is being asked, try to answer them. Compare your answers with the answers given. Review the Free Response Question and the answers to it as well.
2. Under no circumstances should you wait until the week before school starts to prep for APES. There's just too much material to cover, so plan time each week throughout the summer to peruse these materials.

### **AP Achiever – Advanced Placement Exam Prep Guide**

1. This is a paper-backed book so you'll need to take care of it. You will be required to read the chapters within, (there's a lot of them but they are short). Following each chapter are diagnostic tests. Please take them and compare your answers with the publisher's answers. Make a note of questions and answers that you do not understand.

These chapters and the Special Focus Reading Packet will give you a good overview of the course.

Please be **ready**.

### **FINALLY:**

Consider the following quote, attributed to Aristotle (365 BC), one of history's great minds and teachers:

***“When the student is ready, the teacher appears.”***

Please be prepared to discuss what he may have meant by this.

**Have a great summer and stay in touch.**

Mr. Dan Chamberlin  
Instructor of AP Environmental Science
