

TUTORING

Wherever possible within the working day, each teaching staff member shall assist assigned pupils in the remediation of individual learning difficulties.

The remedial program may include use of other district pupils especially proficient in the particular subject. Such pupil-tutors shall be under the direct supervision of an appropriate staff member.

When possible, the CSA will develop programs to assist and improve the learning comprehension of students in need of remediation. These programs may be pre or post academic day and will be supervised by the administrative team and specific designee.
