Going through Covid-19 has been very tough for all of us, however for some people it gave them a chance to improve on something or even change something. For me I took this opportunity to improve on my sports. I made wrestling my anti drug, Wrestling gave me an opportunity to have fun and get very good at a different part of wrestling. I loved doing wrestling and all of my other sports that I played through Covid. I can now refer to this as my anti drug and now make sure that I don't drink alcohol or do drugs.
