

## “Going Green” on Earth Day

For Earth Day 2017, the KRHS Interact Club and the McKeown Elementary School fifth grade students created “Save the Earth” designs on reusable, canvas totes. The students donated these earth friendly bags to the Manna House Food Pantry in Newton. Food was then handed out in a colorful, eco-friendly tote rather than a plastic bag.

This inspiring project:

- Helps the Earth
- Gives individuals a bag they can reuse
- Carries an artistic message to care for our planet
- Puts a smile on the face of its recipient

Thank you to all the students for your community service work. You are a terrific example of service to the Earth and to one another. Thanks for all you do!
