

Pirates at KRHS?

Landlubbers beware! Pirates have gained access to Mrs. Kolonoski's class. Apparently, the pirates were unable to hoist their flag the Jolly Roger on their ship. They have enlisted the help of the seventh and eighth grade classes to build prototypes with the limited materials they had available to them. The students had only 35 minutes to construct the four-foot model as the pirates would need to set sail with the tides. No pressure there.

Quickly, Mrs. Kolonoski's students set to work, as no one wanted to be walking the plank later. All students

chose to use the paper towel rolls to create the pole itself, but everyone had different solutions as to how to make the pole sturdy and how to keep it standing. Once that was established, they had to figure out how to raise and lower the flag while making sure the Jolly Roger could be removed when it was brought down.

Here are some of the teams with their finished flag pole.

Joey Falchetta and Aidan Sajdak

Marah Whitby, Riley Hough, and Taylor Current

Christie Liuzza, Charlize Templeton, and Julia Cucchiara

Austin Babcock and Jackson Choma

CJ Orrico and Isaiah Perrelli

Fortunately, the pirates left peacefully after resolving their dilemma. Thank you to Mrs. Kolonoski's classes for assisting the pirates and averting what could have been a huge problem.
