Only 28 students in the state of New Jersey were invited to attend the Governor Murphy's press conference regarding the vaping epidemic and five of them were Kittatinny Regional High School students. The KRHS students represented the Sussex County Youth Tobacco Action Group supporting the Governor's proposed legislation to ban flavored e-cigarettes, including menthol, in the state of New Jersey.

Their shirts had the web address for <https://incorruptible.us/> which has a lot of information regarding health issues and various news article links on the subject of vaping. It is a way for students to encourage their peers not be victim to addiction.

After the press conference, Governor Murphy had a conversation with his invited guests to gather their input on the topic as well.

Thank you to all the students who are making the time to delve into this very important issue. Giving accurate data allows people to make an informed decision.
