

**EVALUATION OF DISTRICT AS A WHOLE**

---

The Board has directed the annual evaluation of all parts of the district operation. The evaluation of the district as a whole must reset on the results of these individual evaluations. Therefore, the superintendent is directed to coordinate the results of the evaluation of administration, business and non-instructional operations, personnel, and instructional programs (including pupil progress and the state evaluation) into a unified report to the Board on the strengths and weaknesses of the district before the September meeting of the Board.

This unified report shall state the indicators of achievement used in each area.
